

BENARD OMBOGA

Junior Software Developer

+254715012201 • benardomboga@gmail.com • <https://www.linkedin.com/in/benard-bebeni/> • <https://www.bernardbebeni.com/>
• <https://github.com/Bernard065>

Summary

Junior Software Developer with over 2 years of experience crafting high-quality software solutions using MVC frameworks and design patterns. Skilled in unit testing, code reviews, and agile methodologies, with a proven track record in performance optimization and scalable system architecture. Adept at collaborating with cross-functional teams to deliver robust, maintainable applications that drive business success.

Key Achievements

SQL Performance Enhancement	SQL Automation Success	Database Testing Automation
Increased database efficiency by 30% using SQL, improving overall application performance significantly.	Achieved a 40% increase in process efficiency through automated SQL testing and monitoring systems.	Created database testing app increasing efficiency by 65% through automation.

Projects

Sleepy Tabs Guardian

- Sleepy Tabs Guardian is a Manifest V3 Chrome/Chromium extension designed to keep your browser fast and memory-efficient by intelligently managing inactive and resource-heavy tabs. It automatically puts idle tabs to sleep and reloads pages that exceed configurable memory thresholds, while giving users full visibility and control through a rich telemetry dashboard.

Dev Overflow

<https://dev-overflow-khaki.vercel.app/>

- Built a Q&A platform for developer discussions with React, Next.js, and MongoDB. Increased engagement by 40% through real-time voting. Revamped architecture using MVC, cutting server response time by 40% and enhancing scalability by 75%.

Threads

<https://threads-application-nine.vercel.app/>

- Implemented a real-time notification system using webhooks and SSR, maintaining 99.9% uptime and delivering 50,000+ notifications daily with an average latency of 200ms, enhancing user engagement. Developed a community forum with role-based access control, moderating 100+ user posts weekly and sustaining a 95% positive feedback rating through efficient triaging and team collaboration.

Wealth Track

<https://wealth-track.vercel.app/sign-in>

- A personal finance dashboard enabling users to track expenses, manage accounts, and perform secure peer-to-peer transactions. Implemented encrypted money transfers using Plaid and Dwolla APIs, enhancing trust and user confidence. Built a scalable backend architecture powered by PostgreSQL for efficient data management and performance. Authored comprehensive technical documentation to support team collaboration and future development.

PROFESSIONAL EXPERIENCE

Otigo Research and Technology Hub	Nairobi, Kenya
Junior Software Developer	2024 - Present
- Successfully transformed whole project from python 2 to 3.8.0 - Scripted unique test plans, test scripts and processes to remove previously known redundancy by 40% and ensured predictable outcomes - Developed a desktop application to automate database testing process, improved efficiency by 65% - Automated process to create usage graphs, increasing accuracy by 20%	
VFS Global	Nairobi, Kenya
Operations Officer	2023 - 2024
- Managed data collection and analysis for over 1M visa applications monthly, ensuring compliance with organizational standards. - Analyzed trends from a dataset of 5M customer entries to identify key factors influencing visa processing times. - Enhanced reporting efficiency by 30% by developing systematized dashboards. - Enhanced data accuracy by 25% by implementing advanced data validation techniques.	

PROFESSIONAL EXPERIENCE

Freelance

Software Developer

Remote

2022 - Present

- Improved application performance by 30% through legacy code refactoring and algorithm optimization in key projects.
- Delivered 12+ bespoke software solutions for clients in finance and healthcare sectors, ensuring customized functionality and client satisfaction.
- Decreased bug incidence by 25% by conducting rigorous code reviews and integrating automated testing frameworks.
- Assisted in database management tasks including writing SQL queries and updating records to support application data needs.
- Maintained documentation of code changes and development processes to facilitate knowledge sharing and ease of future maintenance.

Kenya Education Management Institute

ICT Support Officer

Nairobi, Kenya

2019 - 2023

- Increased digital learning adoption by {35%} by developing and maintaining robust network infrastructure for schools.
- Supported and maintained ICT systems to ensure smooth institutional operations.
- Trained 1000+ teachers and students in the Digital Literacy Programme, boosting digital skill application in classrooms.
- Enhanced student access to online resources by improving connectivity and system uptime by 40%.
- Maintained ICT systems supporting daily operations for [XX] staff and [XXX] users, ensuring 99.9% system availability.

Education

Chuka University

Bachelor of Science, Computer Science

Kenya

2014 - 2018

SKILLS

Tools:

Java · C++ · Python · Perl · MySQL · ASP.NET · Adobe CC · Canva · CSS · Figma · HTML · JavaScript · PHP · SQL · Communication · Creativity · Integrity · Agile · Apache · Apache Kafka · Data Structures · Git · Java Spring · JIRA · Kafka · RabbitMQ · SpringBoot · GitFlow · Test-Driven Development · Microservices · Angular · Problem-Solving · Teamwork · Test-Driven development · CRM · ERP · HubSpot · Salesforce · SAP · Node.js · CRM Systems

Operating Systems: Unix · Solaris · Linux · Windows

Strengths

 Application Performance Improved application response time by 25% leading a development team.	 Database Optimization Boosted database efficiency by 30% through advanced SQL techniques.	 Process Optimization and Automation Reduced process redundancy by 40% by scripting unique test plans and automation tools, increasing overall efficiency.
